## PROJECTS

**SOUL: A 3-D Scrolling Site | Github URL**          June 2024

- Crafted 3D space for 20 great quotes using HTML, CSS, & Three.js.
- Designed 5 auto-moving objects, including planets, stars, and a rocket, to enhance perceptibility.
- Implemented smooth scroll interactions, custom animations, and lighting effects for a visually immersive experience.

**LEARNIVERSE: E-Learning Website | Github URL**     May 2024

- Built a responsive online learning platform for limitless access to education anytime and anywhere.
- Designed to offer a 15+ variety of courses focused on enhancing professional skills and personal growth.
- Built using HTML, CSS, and JavaScript to ensure a seamless user experience.

**Personal Portfolio Website | Github URL**          May - June 2023

- Accomplished a portfolio using HTML, CSS, and JavaScript.
- Showcased background, 4 types of skills, and 7+ projects to highlight expertise in creativity and animation.
- Applied user-friendly design for easy navigation and contact.
